

Economist/econometrician

Full time

Mid-level position

Fathom is a world-leading, independent consultancy based in London. We specialise in macroeconomics, geopolitics and financial market research. We make it our business to challenge conventional thinking and to convey rigorous analysis in plain English.

Our team of economists and data analysts produce global research and undertake bespoke consultancy projects to address topical issues. Our diverse client base includes governments, global asset managers, hedge funds and major corporates. Our world-leading research can be highly non-consensus; consistently challenging conventional thinking. We are proud to stand out.

We are looking to hire a candidate who could assist in the creation and maintenance of Fathom's suite of proprietary macroeconomic, financial and geopolitical models. These range from short-term forecasting tools to larger general equilibrium models. In addition, they would be expected to assist in other areas of Fathom's research and consultancy business. The ideal candidate would have experience in econometric modelling, familiarity with economic theory, and be a good all-rounder with at least two years of professional experience.

The successful candidate would be based at our London office (and will have the opportunity to work some of the time from home under a hybrid model of work).

Desired skills

A good working knowledge of EViews (knowledge of R/other forms of coding also helpful)

Familiarity with econometric techniques

Microsoft Excel at an intermediate to expert level

The ability to write clearly and succinctly for both economist and non-economist audiences

Experience of presenting to a diverse audience

Experience and qualifications

2–5 years of previous relevant work experience

A degree in economics preferably at master's level

Further information

Fathom is an equal opportunities employer. Please let us know if you require reasonable adjustments to be made throughout the recruitment process.

Fathom currently employs a hybrid model of working, with approximately 50% of our time spent in the office and 50% working from home.

Successful candidates will be contacted by email or telephone to arrange a first-round interview. Second-round interviews will involve a skills-based test.

If you would like to be considered, please submit your application together with a covering letter explaining your interest in this role. Applicants who do not submit a covering letter as well as their CV will not be considered.
